## ONE WORLD KITCHEN PREMIERE AT L'ATELIER D'ARGENTINE

06.09.15

Two Mondays ago, I was invited at L'Atelier d'Argentine for the premiere of One World Kitchen's first episode aired on the new Canadian food and lifestyle channel: Gusto TV. Natalia Machado, L'Atelier d'Argentine's famous chef, hosted the episode and shared with us her passion for fine Argentinian cuisine. The evening agenda: welcoming cocktail and bouchées, presentation of the new executive chef Natalia Machado, the viewing of the episode and the episode's recipes tasting.

First things first, the venue was absolutely gorgeous. Located in the Old Port, L'Atelier d'Argentine is decorated in rich wood and in modern lighting. The beautiful contemporary fireplace, the DJ booth and the small lounge across the bar really caught my attention as they are so elegant. The atmosphere was very welcoming, easy-going and chill: definitely a go-to lounge and restaurant if you are looking for a great girl's night out or for a date!

Now on to my favourite part: the food. Everything was beyond delicious. I have never tasted Argentinian cuisine before and I was very impressed with Natalia Machado's menu. We had the opportunity to taste the Duck Carpaccio with Lemon Curd and Sugar Cured Onions, Humita, Swiss Chard Fritters, Cheese Bread, Pomegranate Salsa and finally the Churros with Chocolate and Dulce de Leche sauce. Everything was so flavourful and fresh. The presentation as well as the mixture of the flavours found in Natalia Machado's fine cuisine was pure a pure delight for the eyes and for the taste buds.

From trendy restaurants in Buenos Aires to working with world-renowned chefs in NYC, award-winning chef Natalia Machado has earned international recognition: she was crowned America's Sweet Genius and the winner of The Food Network's Chopped. She is now Executive Chef at L'Atelier d'Argentine and ready to share her love for Argentinean cuisine with Montreal!

Don't forget to follow me on social media! I follow back <3
